

Tony Rocco, P.Eng. , CCP Mechanical Engineer

Credentials and Affiliations

- CCP, Certified Commissioning Professional
- P.Eng., Licensed Professional Engineer of Ontario
- B.Eng., Bachelor of Mechanical Engineering
- Member, Building Commissioning Association
- Member, American Society of Heating, Refrigeration and Air Conditioning
- Member, Canada Green Building Council
- Member, Professional Engineers of Ontario

Professional Experience

Mr. Rocco maintains a broad range of understanding in facility operations, commissioning, mechanical design, energy management, and balancing. His experience includes:

- Commissioning Provider for eight years
 - Mechanical Design Engineer for seven years
 - Energy Engineer for five years
 - Noise and Vibration Control Technical Representative for two years
 - Test and Balance Technician for one year
 - Facility types include; education, health care, laboratory, clean room, office, residential, and industrial
 - Commissioning experience includes testing and verification of HVAC systems, controls, air and water balancing, specialty plumbing, and integration with other building systems (fire and life safety, electrical power, lighting controls, security, etc.)
 - Operations experience includes energy management, operation and maintenance of all HVAC equipment and controls for a multiple site K-12 school board
 - Design experience includes; plumbing and drainage, fire protection, mechanical piping, HVAC, and industrial ventilation
 - Energy experience includes; development of baseline benchmarks, identification of facility improvement measures, energy savings calculations, HVAC equipment performance tests, optimization of building controls, cost estimates and report writing
 - Noise and vibration control primarily for HVAC equipment
 - Testing and balancing work established air and water flows for HVAC systems
-
